Personal Project Part 2: Website Development (100 points)

For this part of the project, your goal is to develop the website from the design you submitted earlier in the course. It is now time to convert the design into HTML and CSS.

You will be working on this part of the project until the due date near the end of the term. It will be turned in at that time.

Your web page development should include features based on topics covered during the course. This includes the following.

- HTML tags
- CSS styles
- Lists with Bullet Points
- Image(s)
- Hyperlinks
- Column
- Table(s)
- Form(s)
- Multimedia

Pay attention to details including:

- Usage of page titles and headings.
- Page Structure with div and semantic elements
- Use of ID, Class names
- Links show good style and all work correctly
- Files stored in organized folder system
- HTML best practices (naming conventions, organization, indentation etc.)
- Code Comments
- Design (Visually pleasing with proper spacing, size and alignment.)
- Accessible for text-based usage
- Well thought out content (spelling, alignments etc.)
- Content appropriate for course project.
